SUMMARY

First Class Software Engineering graduate with one year of industry experience developing healthcare mobile applications and AI-enabled web platforms. Experienced with TypeScript, Python, Next.js, FastAPI, Flutter, and cloud-backed application development. Seeking a graduate software engineering role focused on full-stack, mobile, or applied AI systems.

EXPERIENCE

TRAINEE SOFTWARE ENGINEER | LIVEROOM TECHNOLOGIES PTE. LTD. | AUGUST 2024 – AUGUST 2025

- Contributed to the development and optimization of two healthcare-domain mobile applications (Health Monitoring and Secure Health Data Sharing) using Flutter.
- Enhanced application performance, stability, and consistency while managing the end-to-end mobile deployment lifecycle via App Store Connect and Google Play Console.
- Developed frontend components for an AI-Powered Blockchain Platform using Next.js.

PROJECTS

AEGISHEALTH (FINAL YEAR PROJECT) | PYTHON, PYTORCH, FASTAPI, GRPC, NEXT.JS, ELECTRON.JS, SUPABASE | JULY 2026

- Built a privacy-preserving federated learning platform for cross-hospital anomaly detection on non-IID health data while keeping patient data local to each institution.
- Designed FastAPI and TLS-secured gRPC services for job orchestration, client registration, quorum handling, federated-round coordination, and model aggregation.
- Implemented LSTM time-series modeling with FedProx, Differential Privacy, and optional Homomorphic Encryption for robust, secure aggregation.
- Developed role-based Next.js dashboards and an Electron edge client for participation, monitoring, audits, and model-release workflows.

CPR ASSIST | PYTHON, FASTAPI, PYTORCH, OPENCV, REACT NATIVE, MONGODB | APRIL 2026

- Developed a real-time mobile CPR guidance system using computer vision to analyze technique and deliver immediate training feedback.
- Built a React Native mobile experience with camera processing and a FastAPI backend for ML inference, session management, and role-based APIs.
- Implemented session quality scoring and instructor analytics to track learner performance and support data-driven training review.

FINFLOW-AI | *ANDROID, KOTLIN, JETPACK COMPOSE, FIREBASE, KTOR, GEMINI API* | *AUGUST 2025*

- Built an intelligent Android financial-management application using modern Android architecture and Material Design 3.
- Integrated the Gemini API to generate real-time AI-powered financial insights and personalized coaching.
- Used Kotlin Coroutines and Ktor for asynchronous operations, with Firestore supporting real-time transaction tracking.

AI-POWERED CRM PLATFORM | *NEXT.JS, NESTJS, TYPESCRIPT, MONGODB, OPENAI API* | *MAY 2025*

- Engineered a full-stack CRM with intelligent lead management, automated customer support, and role based dashboards.
- Integrated predictive analytics, sentiment analysis, and custom AI chatbots to support sales and marketing workflows.
- Implemented multi-factor authentication and structured frontend, API, database, and business-logic layers for secure operation.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, Java, Kotlin, Dart, SQL.
- **Web & Desktop:** Next.js, React, Electron, Tailwind CSS.
- **Mobile:** Flutter, React Native.
- **Backend & Databases:** NestJS, Express.js, FastAPI, PostgreSQL, MongoDB, Supabase, Firebase.
- **Tools/DevOps:** Git, Docker, Postman, AWS, Vercel.

EDUCATION

BENG (HONS) SOFTWARE ENGINEERING WITH INDUSTRIAL PLACEMENT | *UNIVERSITY OF WESTMINSTER / INFORMATICS INSTITUTE OF TECHNOLOGY* | *2022 - 2026*

- First Class Honours.
- Relevant Modules: Object Oriented Programming; Database Systems; Software Development Group Project; Machine learning and Data Mining; Algorithms: Theory, Design, and Implementation; Cyber Security; Formal Methods; Concurrent Programming; and Operational Research and Optimization; Final Year Project.

GCE ADVANCED LEVEL | *ST. THOMAS' COLLEGE, MATALE* | *2018 - 2021*

- Results: C, S, S (Physical Science Stream).

GCE ORDINARY LEVEL | *ST. THOMAS' COLLEGE, MATALE* | *2016 - 2017*

- Results: 9x A's.
